National Occupational Standards

Description

This OS unit is about Fundamentals of On-farm strategies to mitigate climate risks for any enterprise including agriculture & allied activities.

Scope

The scope covers the following :

- Review climate and enterprise data
- Identify and analyse climate risks and opportunities
- Prepare climate risk management strategies

Elements and Performance Criteria

Fundamentals of On-farm strategies to mitigate climate risks

To be competent, the user/individual on the job must be able to:

- PC1.** Obtain and interpret historical climate data, including any natural disasters, from a range of sources
- PC2.** Identify weather and climate risk factors
- PC3.** Collect information on normal and significant climate events and their impact on natural and rural systems
- PC4.** Detail current and historical property and enterprise production
- PC5.** Review short and long term enterprise goals to ensure they fit within climatic constraints
- PC6.** Source and update climate and enterprise data according to enterprise requirements

Identify and analyse climate risks and opportunities

To be competent, the user/individual on the job must be able to:

- PC7.** Analyse forecasted chances of seasonal climate for the enterprise region
- PC8.** Identify climate risks and opportunities for the site and enterprise region
- PC9.** Determine impact of different weather and climate risk factors on production
- PC10.** Use qualitative and quantitative techniques to analyse risks and opportunities
- PC11.** Evaluate importance of climate variability and significant climate events
- PC12.** Outline practices to address a range of different climate variability risks and opportunities
- PC13.** Identify contingency options for enterprises and the business

Prepare climate risk management strategies

To be competent, the user/individual on the job must be able to:

- PC14.** Analyse climate variability and seasonal climate forecasts
- PC15.** Predict the impact of climate variability on the environment, property value and equity
- PC16.** Identify production/business strategies that address major climate risk factors
- PC17.** Identify production/business strategies that include consideration of insurance to cover loss in the event of significant or unusual climate activity
- PC18.** Prepare financial forecasts for all strategies according to enterprise guidelines

National Occupational Standards

- PC19.** Review preferred production, enterprise or alternative strategies and select options appropriate for the enterprise
- PC20.** Document strategies to manage risks associated with variable climate

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types and sources of data used to record weather patterns
- KU2.** qualitative and quantitative techniques to analyse risks
- KU3.** impact of weather and climate on production/business activities
- KU4.** difference between weather and climate
- KU5.** causes of general patterns of weather and climate over India
- KU6.** climate variability and climate change impacts for local region
- KU7.** property and enterprise management decisions affected by the current and predicted climatic variability
- KU8.** recognition of climate risks and opportunities
- KU9.** seasonal climate forecasting systems and related indicators
- KU10.** contingency planning including natural disaster planning for site
- KU11.** a definition of risk management, including the identification, assessment, and prioritisation of risks followed by coordinated and economical application of resources to minimise, monitor and control the probability and/or impact of events
- KU12.** potential impacts of climate change on land and natural resource management
- KU13.** strategic options and planning in response to climate variability for a range of seasons (normal, drier or wetter than normal)
- KU14.** how to calculate financial returns for different strategic options
- KU15.** digital applications to access, record and analyse data
- KU16.** principles for decision-making, based on the variable climate and seasonal climate forecasts.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** make work-related notes
- GS2.** read the relevant literature to get the latest updates and information about new technologies
- GS3.** communicate professionally with clients and co-workers as per the business code of conduct
- GS4.** listen attentively to understand the information/ instructions being given by the speaker
- GS5.** plan and schedule tasks to ensure timely completion
- GS6.** identify possible disruptions to work and take preventive measures
- GS7.** apply domain knowledge and experience to suggest appropriate solutions to customers
- GS8.** take quick decisions in case of any emergencies/ accidents
