National Occupational Standards

Description

This OS unit is about repair and maintenance of solar powered equipment/machinery used principally in agriculture, horticulture, and conservation and land management work.

Scope

The scope covers the following :

- Prepare for repair and maintenance work
- Carry out repair and maintenance work
- Complete repair and maintenance activities

Elements and Performance Criteria

Prepare for repair and maintenance work

To be competent, the user/individual on the job must be able to:

- PC1.** Select and inspect tools, equipment and materials appropriate to job requirements
- PC2.** use personal protective equipment according to job requirements and task to be undertaken
- PC3.** apply basic diagnostic techniques to assess the fault
- PC4.** Carry out dismantling of solar powered applications appropriately
- PC5.** Identify hazards in the workplace, assess and control risks appropriately

Carry out repair and maintenance work

To be competent, the user/individual on the job must be able to:

- PC6.** Confirm machinery and equipment faults, malfunctions and deterioration of components
- PC7.** Check for the applicability of warranty cover and process for repairs and replacements by product manufacturers / suppliers
- PC8.** Estimate scope and cost for repair and maintenance activity
- PC9.** Identify worn or damaged parts and remove or overhaul
- PC10.** Implement repair and replacement process for major repairs according to workplace requirements and manufacturers' specifications
- PC11.** Report complex faults and repairs and refer for specialist advice and remedial action appropriately
- PC12.** Retrieve lost equipment appropriately

Complete repair and maintenance activities

To be competent, the user/individual on the job must be able to:

- PC13.** Reassemble and test solar powered equipment/machinery for full function
- PC14.** Clean and store tools and equipment appropriately
- PC15.** Collect, treat, dispose of or recycle waste from service and repair activities appropriately
- PC16.** Clean, maintain and return work areas to operating condition
- PC17.** Document information appropriately

Knowledge and Understanding (KU)

National Occupational Standards

The individual on the job needs to know and understand:

- KU1.** Different types of solar-powered equipment/machinery used for agriculture
- KU2.** construction of solar powered equipment/machinery in agriculture and their maintenance requirements
- KU3.** Components of solar-powered equipment/machinery, maintenance requirements and repair procedures
- KU4.** working principles of solar-powered equipment/machinery
- KU5.** Applicable warranty covers for the solar-powered equipment/machinery
- KU6.** Alternating and direct current
- KU7.** AC and DC solar systems
- KU8.** types, characteristics, uses and limitations of solar- powered tools
- KU9.** tools required for service and repair activities of solar-powered equipment/machinery
- KU10.** basic diagnostic processes and techniques
- KU11.** environmental codes of practice with regard to maintenance activities
- KU12.** work health and safety legislative requirements

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to get the latest updates about the field of work
- GS3.** listen attentively to understand the information being shared
- GS4.** communicate politely and professionally
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** take quick decisions to deal with workplace emergencies/ accidents
- GS7.** identify possible disruptions to work and take appropriate preventive measures
